

NMR brush DWK

[Product in eShop](#)[Home](#) / [Labortops_Q3_2025](#) / NMR brush DWK

Product Data

- Manufactured from stainless steel and nylon
- For cleaning NMR tubes
- Due to the accuracy of fit, the bristles rest against the inner wall of the glass and an optimal cleaning process is possible
- Length: 250 mm

Nuclear magnetic resonance spectroscopy (NMR spectroscopy) is a spectroscopic method to elucidate the structure of molecules and compounds. Due to electronic interactions of single atoms with the neighbouring atoms, structural conclusions can be drawn. In addition to structure elucidation, the concentration and dynamics of molecules can be determined with this method. This analytical method requires very precise tubes with a constant diameter, a uniform wall thickness and excellent straightness across the entire tube. Deposits and contamination in NMR tubes can be dissolved with the help of the NMR brush. Subsequent cleaning with a suitable solvent completely acidifies the NMR tube.

Item No.	type no.	Price
8.9074.00	NMR brush	CHF 4.25

* The prices are non-binding and are to be understood as selling prices in Swiss francs without value added tax (VAT), as well as all other fees, charges and taxes. The prices displayed in the eShop may differ from the PDF file due to regular updates.

** Please note that when ordering chemicals and detergents, transport and packaging costs for hazardous goods as well as legally prescribed fees are charged. These will be shown in detail on the order confirmation, which you will receive in addition to the confirmation of receipt.

*** Further information such as technical information and safety data sheets can be found online in our eShop.
